Resources

The screenshot shows the CHIRP website's 'Downloads' page. At the top, there is a navigation bar with links for '概述', 'Download', '活动', '路线图', '问题', '新闻', 'Wiki', and '版本库'. Below the navigation bar, there is a central box with a 'Donate' button and logos for various payment methods (MasterCard, Visa, PayPal, Bank). The main content area is titled 'CHIRP downloads' and contains the following text:

CHIRP is distributed as a series of automatically-generated builds. Any time we make a change to CHIRP, a build is created for it the next day. Thus, CHIRP is versioned by the date on which it was created, which makes it easy to determine if you have an older build. We don't put experimental things into CHIRP before they are ready, except where specifically called out with a warning. Thus, you do not need to worry about finding a stable version to run. **You should always be on the latest build available.**

You can find a complete test report of the current build [here](#) and a matrix of supported models and features [here](#).

Windows Users

[Click here to download the latest Windows version](#)

- CHIRP runs on Windows 2000, XP, Vista, 7, 8, and 10. Older versions of Windows are **not** supported
- Most users will want to download the installer.exe file, which installs CHIRP like a normal application
- The win32.zip file is for advanced users wishing to run CHIRP without installing

MacOS Users

[Chirp Software Mac Os X](#)

Download

Is your Mac up to date with the latest version of the Mac operating system (macOS or OS X)? Is it using the version required by some product or feature? Which versions are earlier (older) or later (newer, more recent) than the version currently installed? To find out, learn which version is installed now.
