lishimageslinuxmoldflowadvisor2019linuxkeyrealeasylinuxmoldflowadvisor2019publishimagescom nacc, good evenin' woah younder, ^^ younder: sorry younder: that was for you: younder: thanks! Thanks! ^^ that is what happens when I hold shift it resizes the screen (if I can call it that) so i can see it all no idea why it would even be do it that way, i tried to fix it when i did this last time.. still no go xmetal: is this Unity? i am using kde i think i am trying to do a drag operation with the touchpad (that is my mouse) same thing happens using the mouse in firefox so i suspect it is a touchpad issue ...but that is what is happening xmetal: i don't think you're asking the right question well, it is a gnome panel i am using xmetal: right, but that panel and any applets running on it are using the gnome keyboard stuff to do the dragging xmetal: gnome is using the dragging dnd api oh that was not my question hah i don't use a panel i have xfce xmetal: and it is using the same dnd interface as unity/gnome to do the

---

resize. I don't see how else it could work? i have use a mouse, or keyboard mouse combo (different mouse/keyboard) it did not  
resize (same effect with the mouse 82157476af
